May 29, 2013

Ref: **Restriction of Hazardous Substances Directive or RoHS**
Directive 2002/95/CE and Directive 2003/111EC

To Whom It May Concern:

Ed Fagan Inc. is a stocking distributor of Specialty Metals and Alloys. We have surveyed our major suppliers for compliance with **Restriction of Hazardous Substances Directive (RoHS)**. They have all responded with letter certifying RoHS compliance. Base on this, Ed Fagan Inc. can state, that Ed Fagan Inc. complies with Directive 2002/95/CE and Directive 2003/111EC:

Directive 2002/95/CE - The following materials are not contained in our steel and alloy products:

Asbestos, PBB's and their ethers/oxides (PBDE's, PBBE's), DEHP, Penta or octa-BDE brominated flame retardants, Organic tin compounds, Organophosphate compounds, Phthalates, Ethylene glycol ethers, and PCB's.

Chromium (VI) and its compounds are absent in all of our metal products since any Chromium present would be in the zero (0) valence state as the metal.

Cadmium, Lead and Mercury (or their compounds) are not added intentionally to any of our alloys. These elements may be present at trace levels as a result of raw material impurities. These elements will also be removed to some extent during the various melting processes. Analysis of the specific grades procured by your company indicate that Cadmium and Mercury are either absent or consistently <5ppm in the final product. Lead is also absent or < 10 ppm in the final product.

Directive 2003/111IEC - The following materials are not contained in our steel and alloy products:

Pentabromodiphenyl ether (pentaBDE) and Octabromodiphenyl ether (octaBDE).
I trust this information will be satisfactory to you, if not please do not hesitate to contact me for further information.

Thank You,

Ed Fagan
President
